

Psychic Hearts

Cat Power

(thurston / live) I know you have a fucked up life
Growing up in a stupid town
Your mother was a mixed-up chick
And your father he just fucked around A little too much for his own good
I'd kill the bastard if I could
I'd kill all the boys with their fucked up noise
And all the bullshit they seem to enjoy In school
Call you slut
Nothing but
What the fuck are they into
Stupid fools
Losers assholes suck all the luck
Out of the world the world with you
If I can get it back to you I will
Kick their asses all over town
All over town I'll turn it over I don't even know you that well
What the hell summer spell What's it like
Goin' out
No-one knows what you're about
Abused and used and cut in two
The hollow man have nothing to do Laugh all the time try to get high
And try to hide behind though lie They fucked your head up
That's for sure
Your heart is ripped now wrapped in fur
But you know that sex is pretty insane
And magic seems to kill the pain
And the things that go on inside your brain
Makes you seem to think that you're to blame
Don't think about it
Grow it out
Love ah-all (?) and say it loud
Fight the scumbags that slap you around
Scream your crazy lost and found
We don't have to tell you what is right
We have all the faith it was not right Sadness is and sadness was
And sadness will always be because
Comfort comes around from the strangest of men I got no time for sad songs baby
Don't need you to say I'm crazy
Stick your tongue and you look at me

And I will buy it obviously
Push you down onto your knees
Do you laugh away in sleaze You're not the only girl in town
But you're the only one that's got me down
Psychic hearts go out to you
Psychic heart go round to you My prayer to you
Is that you do all the things you set out to do
And look yr. life the way you love
But will you remember one thing for me
I will always love you
I will always love you
