

Wild Life

Hedley

Scratch scratches
Fire starts with matches
They're burning down the world and chopping down with hatchets
Life in plastic
Blood still splashes
Running round like animals in city soaked in ashes If you wanna be with me I could need you now
It's a jungle out there and the teeth are out.
Find a better place to be safe with me tonight.
In this wild world it's a wild life Cuts, clashes,
Claws for the slashes
Uncivilized civilization when it crashes
Just some tragic
Creatures in the sadness
Rat racing, dog piling, animals of madness If you wanna be with me I could need you now
It's a jungle out there and the teeth are out.
Find a better place to be safe with me tonight.
In this wild world it's a wild life If you wanna be with me I could need you now
It's a jungle out there and the teeth are out,
We'll find a better place to be safe and sleep at night
In this wild world it's a wild life And if you stand by me we'll get away somehow
It's a jungle out there and the teeth are out
Find a better place to be safe with me tonight
In this wild world it's a wild life Scratch scratches
Fire starts with matches
They're burning down the world and chopping down with hatchets
