Lay It All Down

John Martyn

Darling will you walk with me gentle
Come walking through the evening air
And I believe that you can make me feel better
And I believe that you might always be there
I want to move out of town
And follow the sound
And lay it all downDarling do you know I've been lonely
Darling do you know I've been bad
Darling do you know I've been lied to
Darling do you know it made me sad
I want to move out of town
And follow myself
And lay it all down
