## **This Time**

## Jenny Reynolds

I never thought that I could miss The touch of your hand or just one kiss I never meant to say,"It's over" I was a fool to hurt you so I had it all and didn't know But I still believe, we can be in love again This time I'm gonna find a way To hold on to the love that I thought we'd lost forever This time, I'll find the words to say To make it better, let's stay together this time I kept my emotions locked inside Only to watch love pass me by But I've had time to think it over My lonely heart has seen the light So give me the chance to make it right And I pray, I'll see the day when you return This time I'm gonna find a way To hold on to the love that I thought we'd lost forever This time, I'll find the words to say To make it better, let's stay together this time Please don't say, goodbye (Hurting deep inside) We can keep our dream alive if we try (Baby, this time) Oh baby, this time This time, I'm gonna find a way To hold on to the love that I thought we'd lost forever This time, I'll find the words to say To make it better, let's stay together this time This time, I'm gonna find a way (I'm holding on, holding on, yeah) To hold on to the love that I thought we'd lost forever This time, I'll find the words to say To make it better, let's stay together this time
