# City In Silhouettes

## Funeral Party

In between the hours
And in between your days
And you're counting down the minutes
To a sad familiar stage

You're always around
You're never away
It took only seconds
It took only days

You're moving much faster and I was amazed
I'm loving your secrets
Discovered your ways your ways your ways
And you waste away with your life unchanged

Swearing to god you'll never change
This is your moment
This is your life
This is your moment

So kiss your moment goodbye
And your out between the boundaries
And like us you never stayed
And you're far out it the open

But to close to get away
Your doing it now
You're staying up late
You're making me nervous

And I can't wait
To pull you back into where you belong
Where sing the same old, same old story
Same old song And you know just what you do

And I want you for myself
And no one else Oh no one else
This is your moment
This is your life
This is your moment

So kiss your moment goodbye
