

# Natural

Rob Thomas

This is not the life I promised you before  
I can feel them running chains around our door  
And I'm coming to the end of what I'm for  
But I will pull myself together, I am sure I will run for you until I start to drop  
I will breathe your breath until you tell me stop  
We will see the ending of another sunny day  
And we'll wait at home until the next one drops Are we all just sitting here waiting on the end?  
Like it's only natural, it's only natural  
Are we filling spaces till we find ourselves again?  
Like it's only natural, it's only natural This is not the way we wanted this to be  
And I can feel your doubt inside of me  
We're standing on the edge of everything we've ever seen  
And everything we'll never get to be Are we all just sitting here waiting on the end?  
Like it's only natural, it's only natural  
Are we filling spaces till we find ourselves again?  
Like it's only natural, it's only natural And when you think it's over  
It starts coming 'round again  
It's coming 'round again And when you think it's figured out  
It starts coming 'round again  
It's coming 'round again  
It's coming 'round again Are we all just sitting here waiting on the end?  
Like it's only natural, it's only natural  
Are we filling spaces till we find ourselves again?  
Like it's only natural, it's only natural  
It's only natural, it's only natural
