

# Dark Star

[Tarja](#)

Burning out in the distance you're falling  
Starting to fade  
Light is condemned to be tied down by gravity close to the end  
Do you still remember?  
Before the weight that pulled you under  
Dared you to rise Where are you now?  
Are you proud of the life you wasted?  
Wearing the crown of illusion you created  
You'll never know what it feels like to shine  
You're the master in your own mind  
But a slave to all  
You are a dark star Empty  
Is never enough  
You keep clawing for what you can't reach  
Smothering space filled without any grace and I can't breathe  
Nothing lasts forever  
Even the stars will lose their luster returning to dust Where are you now?  
Are you proud of the life you wasted?  
Wearing the crown of illusion you created  
You'll never know what it feels like to shine  
You're the master in your own mind  
But a slave to all  
You are a dark star
