

# A Heart In New York

## Art Garfunkel

New York, to that tall skyline I come  
Flyin' in from London to your door  
New York, lookin' down on Central Park  
Where they say you should not wander after dark  
New York, like a scene from all those movies  
But you're real enough to me, but there's a heart  
A heart that lives in New York  
A heart in New York, a rose on the street  
I write my song to that city heartbeat  
A heart in New York, love in her eye  
An open door and a friend for the night  
New York, you got money on your mind  
And my own words won't make a dime's worth a difference  
So here's to you New York  
New York, now my plane is touching down  
A heart in New York town
