Bulldozer

Raoul Petite

We can beat this, you and me
Just a matter of degrees
I can't calculate this late at night
Honeymooners move in wet cement
They don't know about the walls that rise and rest
Bulldozer, run right over us
Feel us snap and crush and burn and tear
Bulldozer, clear a space for us
Let's rebuild this love on what we were
Come outside, this view is free
Only clear moonlight can reach
You and I will stay low to the ground
Honeymooners, we are bouncing chairs
Cross your fingers that they don't get returned
Bulldozer, run right over us
Feel us snap and crush and burn and tear
Bulldozer, clear a space for us

Let's rebuild this love on what we were
Bulldozer, but we made you fall
You're the last resort to start over
I can feel your arms around me
Pull me closer, hold me tightly
Precious metals now colliding
Look to you, my carbon copy
I can feel your arms around me
Pull me closer, hold me tightly
Precious metals now colliding
Look to you, my carbon copy
Bulldozer, I think you're only one
That can work, that can work, that can work
Bulldozer, step up, this is gonna hurt
Gnash your teeth, take a bite of the dirt
