Fallen on the Sword

A Telemetry

such a strange feeling
in the air today
one of impatient haste
and restless disarray

a relentless sign
one peering eye
looks at all
with electric vibes

you feel the effect
it has on you in your life
still not knowing
you don't know don't know

it's over the moon
the chemistry inside us changes
it's over the moon
the inner tide inside us rages

such a since of release
in a radiant night
one of impulsive decision
and reckless delight

that relentless sign
one staring glow
looks at all
with it's forceful tow

you feel what every
creature felt before you
still not knowing
you must learn must learn

full moon
it effects the earth
it effects the mind
it effects the way
you live your life
