

# No Place Like You

[Josh Schicker](#)

I drove out to the middle of nowhere in the deepest dark of night  
Pulled out my suitcase and started to fill it with things that were not mine  
I then drove across this great nation hoping to find the bright lights  
But all I found was the desert and ghost towns  
They'll probably haunt me for life

I've been a lot of places  
I've been so many places  
And there's no place like you

I've slept in the bed of fantasy with my arms wrapped around a disease  
That looked so beautiful to my greedy eyes, I hardly noticed it was killing me  
I then sat with my doctor for hours hoping she'd give me a cure  
Because no matter what I said or did I just couldn't do anything pure

I've been a lot of places  
I've been so many places  
And there's no place like you

I once sailed across the farthest ocean looking for a clue  
Trying to find the differences between stereotypes and the truth  
I've been on the A-list, arrived VIP, broken bread in some celebrity homes  
But the fact remains that we're all the same  
Take too big a bite, you're going to choke

I've been a lot of places  
I've been so many places  
And there's no place like you
