## **Smother Me**

## **Modern Day Zero**

I never really meant to be
So cold
When it came right down to being
Alone
I never thought that you would be
So low

You could scrape the dirt right from my feet

I know

That the situation can't go on too long And I can't hold on You smother me

And I'm left crawling

All defenses

Seem to fail me

You smother me

To keep me crawling

AwayI never thought that you would be

So cold

When it came right down to being alone

I know

That the situation can't go on too long
And I can't hold on[Chorus]What would you do what would you do if I smothered you[Chorus]
