

Developed

[Nitin Sawhney](#)

Every general Australian should be able to
Keep their culture together by using or exercising
All these elements of today's reality
And that reality is development and that that development
I would think is the way that it should be right
Not something that is put upon us or forced down our throats
You and I know that music is a universal language
And uh, it doesn't have any prejudice
It has one way of thinking without prejudice
