

Make It Precious (Acoustic Live Bonus Track)

Make Me Famous

[Intro:]

OHH!!

Let me see, see your dreams
And just let me touch your heart again
On the street where my beliefs
Never caused you no pain[Verse 1:]

People hurt

They always leave in just a minute
For all those woken in my shirt
(YOU SHOULD ADMIT!) that I just did it
That I just did it[Chorus:]

Feels so hard to find the reason of love
Can't take any longer

You're so much stronger

Since I've been dreaming of a sign from above

Don't get any better

Nothing does matter

My eyes are open wide to see what's coming next

The trace I walk is so empty

I'll give my life to make you never forget

Who the hell you wanted to make me

I'm better than you could be[Verse 2:]

Always so sure

That you can climb the sky

Settle down your mind

And never ever die

Come and kiss me

Oh darling, make me believe

That I could ever give it back,

Just turn my back and leave[Breakdown:]

Never knew if my words

Would make sense again

When you extend your name

With titles and awards

If there is a time for words

To make sense again?

If there is a planet of hopes

Where you and me remain? You mesh my head

And that's the worst thing you could do

I never knew if my words would make sense again[Chorus:]
Feels so hard to find the reason of love
Can't take any longer
You're so much stronger
Since I've been dreaming of a sign from above
Don't get any better
Nothing does matter
My eyes are open wide to see what's coming next
The trace I walk is so empty
I'll give my life to make you never forget
Who the hell you wanted to make me
I'm better than you could be[Bridge:]
A tiny border between love and hate[Breakdown:]
Yeah babe, I was laughing
But now it's true
So make up your mind
And look for your heartbeat
I would connect my life
With every single partYeah babe, I was lying
But now it's true
So make up your mind
And look for your heartbeat
I would connect my life
With every single part[Outro:]
People hurt - they always leave in just a minute
For all those woken in my shirt - admit that I just did itPeople hurt - they always leave in just a minute
For all those woken in my shirt...Admit that I just did it bitch.OHH!
