

# Let It Die

## Magic Jake and the Power Crystals

6 billion minds, controlled by one  
10,000 more, stare down the barrel of a gun  
annihilation by a system of our own design  
your definition of freedom, my friend, needs to be redefined  
a quality, or a state of being free  
your absense of necessity brings a country to its knees  
and your slavedrivin way of government wears the mask of democracy  
and the way you abuse your leadership my friend, doesn't make much sense to me

Watch, watch it die, let it burn, watch your empires crumble  
Watch your empires  
watch them die  
die by the hands of you
