

That's You

Nat "King" Cole

The face in the moon, that's you
The torch in the tomb, that's you
The force in the street, that's you
The memory I meet, that's you The plane in the midnight sky
Repeating goodbye, goodbye
No matter how hard I try
To my regret
I can't forget [Repeat: 2X]
How foolish to warm a flame
With echoes that form your name
You haunted my heart now what can I do
If somebody comes along, to take my blues away
I hope I can say that's youuuu
