

# Heatwave

Charli XCX

It's gonna be a heatwave  
The sun is shining through the clouds  
I put my love into your mouth  
And I feel so high I can't come down  
A heatwave  
I feel your magic on my skin  
You dance around me in the wind  
Open your heart and let me in I wanna dance in the sunlight, get me on my knees  
I'm gonna kiss your body in the summer breeze  
You got a killer smile and I love your steeze  
Come and kiss my body, I'm begging please You are a super special, take me home  
Our love extra special, tastes like gold  
This is another level, oh my God  
I know you need it 'cause you're screaming Heatwave  
The sun is shining through the clouds  
I put my love into your mouth  
And I feel so high I can't come down  
A heatwave  
I feel your magic on my skin  
You dance around me in the wind  
Open your heart and let me in I wanna dance in the sunlight, get me on my knees  
I'm gonna kiss your body in the summer breeze  
You got a killer smile and I love your steeze  
Come and kiss my body, I'm begging please You know I like it when we're playing in the summer breeze  
I know you like to tease me, you've always got me on my knees.  
I'm falling for you more and more every time I stare into your buttercup eyes.  
I'm in love (x4)
