

# Ephemeral

## Insomnium

Darkness is ignorance  
Knowledge is light  
Fight only with yourself  
Or the shadows of the night For this life will break you  
Years will wear you down, wear you down  
And every day you die a little  
Until the shadows will take you, shadows will take you Dying doesn't make this world dead to us  
Breathing doesn't keep the flame alive in us  
Dreaming doesn't make time less real for us  
One life, one chance, all ephemeral, ephemeral Darkness is ignorance  
Knowledge is light  
Fight only with yourself  
Or the shadows of the night All the pain and suffering will dispirit or feed you, dispirit or feed you  
For each and every time your failures will craft you  
When the fear of them is gone, fear is gone Dying doesn't make this world dead to us  
Breathing doesn't keep the flame alive in us  
Dreaming doesn't make time less real for us  
One life, one chance, all ephemeral, We stumble and hover at the edge of the world  
One life, one chance - that's all we have, that's all we have Never walk away  
Turn your back on yourself  
One life, one chance - that's all we have Dying doesn't make this world dead to us  
Breathing doesn't keep the flame alive in us  
Dreaming doesn't make time less real for us  
One life, one chance, all ephemeral, ephemeral
