

Double Bass

Dr Meaker

As sure as the sun does shine
In that heavenly sky
I'll be there for you
I'll care for you
I'll be standing by

I'll be your guide
Through the misty days and lonely nights, girl
I'll be the lone vision over your body and soul
If they lay a finger on you
Hell, they're gonna leave sore
I believe a friend in need
Is a friend indeed
When you're lost without direction
This friend is what you need

Now it's time to grow
Now it's time to know

I don't mean to preach, but man should have faith in man
Out here on the beach
You only watch the sun go down
You see the snow melts away
To dew jeweled streets
And like man always revealed
When the seasons come to full circle again

So hold me, don't leave me alone, it's so dark
Wait for me, wish I was there, when I'm gone
Hold me, don't leave me alone, it's so cold
Wait for me, I don't wanna be on my own.
