Now and Forever

Blue Rodeo

I don't know if I ever wanted
The things you said we want it together
Now and forever
Too many nights I lie awake
Listen to every breath you take
Like a stranger
Feel so out of place hereI don't wonder what went wrong
I wish your memory would leave me alone
Now and foreverI sit alone in this empty house
And your voice just like a ghost
It comes to me
Chill passes through me
I packed your clothes and photographs
Sent your little treasures back where you're living
Guess now I'm forgivenI can't believe it's true
I've thought I'll always be in love with you
Yeah, now and foreverMy life goes on just like before
In and out of closing doors
I don't love it, but I learn to rise above it
I found a girl now who will love me
The way I want her to
She don't shout it
We don't ever talk about itI can't believe it's true
I've thought I'll always be in love with you
Yeah, now and forever
