

This Time Around

Tove Lo

I used to take your breath away
I used to make you laugh about anything
I used to be your getaway
Your getaway, your dream
I was every thing you needed
You used to lean your eyes on me
You used to open up and share your world
You used to lose yourself in me
Let the hours pass, oh running by so fast But now, what I'm doing
Don't know, what I'm doing 'Cause I don't even feel it
Bodies growing colder with the distance now
And I don't even mean it
Got my hands all over you but not a sound I'm always so in love, all in
Till you lost your goal, and I'm thinking
But you make me feel it
Thought that I'd be different this time around
This time around We started out as lonely hearts
We started with a promise built on highs
You said I was the missing part
Looked into my eyes, said
You're my fix for life But now, what I'm doing
I Don't know, what I'm doing 'Cause I don't even feel it
Bodies growing colder with the distance now
And I don't even mean it
Got my hands all over you but not a sound I'm always so in love, all in
Till you lost your goal, and I'm thinking
But you make me feel it
Thought that I'd be different this time around
This time around Don't know what I'm doing
This time around
This time around (x2) 'Cause I don't even feel it
Bodies growing colder with the distance now
And I don't even mean it
Got my hands all over you but not a sound I'm always so in love, all in
Till you lost your goal, and I'm thinking
But you make me feel it
Thought that I'd be different this time around
This time around Don't know what I'm doing
This time around

This time around (x2)
