

Fun Like War

Classic Case

tension is not enough, it's not enough
we should invade and punish them all for acting up
let's burn down the bridges and level the topography till it's dust
proving they're weak don't ask, don't tell and join the ranks
we're making the world such a better place why'd we try to raise the alarm?
will our false pretenses keep us safe from harm? don't frame me for thinking on my own
this is out of our control now it won't be long until we conquer everyone
how fun
replace the leaders and then we'll force on them our industry
till our funds exceed our needs don't ask, don't tell and join the ranks
we're making the world such a better place why'd we try to raise the alarm?
will our false pretenses keep us safe from harm? don't frame me for thinking on my own
this is out of our control
don't frame me for thinking on my own
we are out of our control
