

Doomsday & the Echo

Lovedrug

What's in your head you've gotta believe me somehow
Who's in your head now
I think you're crazy how you run and run around my world
Looking for a reason why I can't walk it off, can't come clean
A pretty shoe, a dirty soul, a God I lost somehow
You think I'm crazy how I run and run with no sound
Tripping on my feet again I just lost it all, just came clean
Hey, just woke up and already I'm a losing
Messed up everything again, drink up, pass the gun again
Hey, just woke up and already I'm a losing
Messed up everyone again, someone pass the gun again, now
I turn it on, I turn it down, echoes in my house
again
And now the doomsday light let the haunting inside
I turn it up and down again
I want you to know that I'm not scared
Hey, just woke up and already I'm a losing
Messed up everything again, drink up, pass the gun again
Hey, I just woke up and already I'm a losing
Messed up everyone again, someone pass the gun again
Walk it off and you'll come clean
Hey, just woke up and
already I'm a losing
Messed up everything again, drink up, pass the gun again
Hey, just woke up and already I'm a losing
Messed up everyone again, someone pass the gun again, again, again
