

# Too Young To Fight It

## Young Love

Take a dare, don't tell the truth, keep this between me and you  
Whispers become loud, when word of this gets out  
Will the message cause a motion, we won't know till we get there  
When the sun's down, light's come up, friends and enemies come together  
Summer nights hitting, it's so hard  
we're blistering  
Can't keep from moving, the season is rising  
We're too young to fight it, we stand united  
Summer nights hitting, it so hard we're blistering  
Can't stop to sleep it off, sleep it off  
Hearts are beating to the sound, kids are living underground  
Rumors get so loud, we want to scream and shout  
It's taking over now, you can't control it  
You're shaking, soaking wet in the middle of the night again  
Will the message cause a motion, we won't know  
till we get there  
When the sun's down, lights come up, friends and enemies come together  
Summer nights hitting, it's so hard  
we're blistering  
Can't keep from moving, the season is rising  
We're too young to fight it, we stand united  
Summer nights hitting, it so hard we're blistering  
Can't stop to sleep it off, can't stop to sleep it off  
Will the message cause a motion, we won't know till we get  
there  
When the sun's down, lights come up, friends and enemies come together  
Summer nights hitting, it's so hard  
we're blistering  
Can't keep from moving, the season is rising  
We're too young to fight it, we stand united  
Summer nights hitting, it so hard we're blistering  
Can't stop to sleep it off  
Summer nights hitting, it's so hard we're blistering  
Can't keep from moving, the season is rising  
We're too young to fight it, we stand united
