

Here It Comes

Modest Mouse

Walked to your house on my lunch break, here it comes
Come inside and pour a drink, here it comes
You'll probably tell me everything you think, here it comes
The place and the time when we knew everything could go wrong
Grass grows green, could you step away from
the screen?
Doesn't mean I don't want you to be seen, just like everyone
Grass grows green and it's just everyone
You always told me life's a dam that breaks, well, here it comes
If you sit still or if you roam, well, here it comes
So now we're drownin' in birthday cakes, well, here it comes
The place and the time where we knew everything could go wrong
Keep it clean, I didn't mean to be mean
Why does it always seem like I've never won?
Keep it clean and no one's ever won
The empty promise will make you sick, here it comes
Make a point to make no sense, well, here it comes
Speak about the future in the past tense, here it comes
Don't look down so what'd we do, here it comes
Walkin' around with shit on our shoes, ohh, well, here it comes
The place and the time where we knew that things would go wrong
