

I Don't Believe It's Through

[Greg Laswell](#)

No matter how far
You don't even need to see straight
You're an excellent shot
At hitting yourself in the foot Maybe sit this one out
I'll hold my breath while you breathe out
You're in excellent shape
In quitting this while you're ahead And maybe I'm a fool
But I don't believe it's through And as for what they say
And as for what stands in your way
And as for Winter
It is only May The next exit is no way out
The bridge ahead is long enough
For you and I to take our sweet time on Maybe I'm a fool
But I don't believe it's through And as for what it takes
To make it through another holiday
For the rest of your New Year's Eves I'm free And as for what it takes
To make it through another holiday
For the rest of your New Year's Eves I'm free
