

Children of the Night

Masterboy

Chorus:

Feel like children of the night
let's walk into the light
like children of the night

Repeat chorus

a child is born to the night
will it live to see the light
ghetto life means tears and pain
many people cry in vain
this generation
over the nation

we're gonna take control
like revolution's
my contribution

so free your mind and soul

Repeat chorus(2x)

education is the key
leave your hands off extasy
respect for life and liberty
Masterboy will set you free
this generation
over the nation

we're gonna take control
like revolution's
my contribution

so free your mind and soul

Repeat chorus(2x)
