

# We Apologise For Nothing

## Fightstar

Just re-write these words upon my grave  
And look down on everything we loved  
Loose lips, sink ships and leaders  
For this you need to lead us all  
For every change that you put down on me  
I've re-read this stone a hundred times  
Would you stand over these shadows  
And embrace our history?  
We apologise for nothing  
Take the world away from us but  
We apologise for nothing  
If I could gather strength a final time  
And dream up a war to end all wars  
Race lists and mist of vengeance  
I don't fear your movements anymore  
Lets celebrate this change in turning tides  
This revolution won't be televised  
Would you stand over these shadows  
And embrace our history?  
We apologise for nothing  
Take the world away from us but  
We apologise for nothing  
Cut me out of all of this  
Cut me out of all of this you say  
Just cut me out of all of this  
Cut me out of all of this you say  
Would you stand over these shadows  
And embrace our history?  
We apologise for nothing  
Take the world away from us but  
We apologise for nothing  
We apologise for nothing
