

Young Blood (7" Edit) [2008 Remaster]

UFO

Young blood where you going now
Young blood where you going now I didn't mind it when you left me honey
But i miss you ain't the truth
I haven't give up hanging on the phone
But all i hear is the proof One more night and
I'm thinking what's going wrong
You say you love me but
Does love take this long You paint a picture you tell a story
Oh the tangled web that you leave
I hear the whispers the candid talking
Arid i don't know what to believe One more night and
I'm thinking what's going wrong
You say you love me but
Does love take this long Where do all these dreams have broken
Right or left it's stolen
Stop your running away Young blood ooh tell me
Where you going now
Young blood ooh tell me
Where you going now It's never never nothings forever
Turning gold in our hands
There's no magic it all seems tragic
'Cause it's slipped through our fingers like sand One more night and
I'm thinking what's going wrong
You say you love me but
Does love take this long Where do all these dreams have broken
Right or left it's stolen
Stop your running away Run run running away
