

Around the Universe in Eighty Days

Klaatu

Around The Universe In Eighty Days

(Dee Long)

Come aboard my ship, I've something to show you

Some new equipment to take us where we're going

A subspace machine, a hole in the fabric

Of the very being of the universe Ignition

Atomic power on

We must break our orbit and soar right past the planets

It took man a million years

To make it only this far

And we'll leave the solar system very soon...

Around the universe in eighty days

Sit down I think you'll like it out in space

There's nothing left to stop us now

We're sure to win the race

(Sure to win the race...) In our warp where time and space are one

We can no longer see the sun

In fact there's nothing there for us to see

For light is nowhere near as fast as we Our computer says we've exceeded expectations

When we reach our departure point there will be celebrations

What this means is our existence no longer has a limit

The universe will be our new home Now the earth is just beginning to learn of our existence

All life in space must learn to live as one

Maybe now is the time for friendship with our neighbors

For our planet is the second from the sun

Around the universe in eighty days

Sit down I think you'll like it out in space

There's nothing left to stop us now

We're sure to win the race

(Sure to win the race...)
