Slither

Earth Crisis

SlitherTry to slither in my soul
Is to take and twist me, their only goal
Won't let the wicked of the world have their way
Seen the traps they've set, so I won't fall preyIt's the end of this era in time, no respect for life
It's all crossed the line
Human wolves slowly train the human cows
To repress instinct and run into their mouthsSlither, can't deny it's real
Slither, can't deny it's real
Resist mind controlSomething sinister behind the scenes
Formulas for suppression pushed into brains
Sheeple accept without questioning
Reactionaries swallow the whole thingWon't be rendered defenseless to the predators
Won't be left without the modern equalizer to deter
Criminals hell bent to victimize
There's a lawless law out to brutalizeSlither, can't deny it's real
Slither, can't deny it's real
Resist mind controlTen thousand eyes follow
From above and from below
Categorizing all to find the ones
To push against the wallStand up or die while there's still time
While there's still time, while there's still time
There is no reason the law abiding should not possess
The means to defend themselves, resist mind controlTry to slither in my soul
Is to take and twist me, their only goal
Won't let the wicked of the world have their way
Seen the traps they've set, so I won't fall preyIt's the end of this era in time, no respect for life
It's all crossed the line
Human wolves slowly train the human cows
To repress instinct and run into their mouthsSlither, can't deny it's real
Slither, can't deny it's real
Resist mind control
