# A Woman Knows

## Kirsten Thien

He's a good man and he's always been
Right there by her side
Through thick and thin she can count on him
He's given her a real good life
He never missed a Valentine's Day
The roses are right on time
And he never walks out of the house
Without kissin' her good bye
But a woman knows
When she's lyin' awake at night
Where her man goes
When he's out of her sight
There's no way to explain
How she knows what she knows
She don't let it show
But a woman knows
He still holds her close at nights
Still feels like makin' love
But somethin' about it just don't seem
To feel the way it was
He still says I love you
Still tuckin' the kids in bed
It's nothin' that he's done
It's nothin' that he's said
But a woman knows

When she's lyin' awake at night
Where her man goes
When he's out of her sight
There's no way to explain
How she knows what she knows
She don't let it show
But a woman knows
And she'll stay with him no matter
What she chooses not to see
'Cause to her it's all about the family
And she's got at least
A hundred reasons not to leave
'Cause he's almost everything she's dreamed

But a woman knows
When she's lyin' awake at night
Where her man goes
When he's out of her sight
There's no way to explain
How she knows what she knows
She don't let it show
But a woman knows
No, she don't let it show
But a woman knows
