Spotlight

Anders Osborne

Sometimes in the middle of the night
I watch you sleep in the pale moonlight
I hold my breath with all my might
Yea, you know I doYour pretty face on the pillow shines
Like a candle and million times
Brighter than the sun and the stars combined
Yea you know you do
Nothin lights me up like seeing youHooo your love is like a spotlight
Hoo, keep shining down on me
You keep me steady when I move too much
Get me ready for what's coming up
Your love is like a spotlightIn the morning when I drive my car
Traffic Jams got me pushed so far
I close my eyes and there you are
Your in my car, in my carSome people got a love that's dark
Tears em up and it breaks their heart
They live together but they always grow apart
Yea you know they doThey don't have the love like me and you
Your love is like a spotlight
Hoo, keep shining down on me
You keep me steady when I move too much
Get me ready for what's coming up
Your love is like a spotlightWhen my soul gets heavy
And the only I thing I can see
Is the part of me that I don't want to see
When you move a little closer
Put your hand in mine and then you
Shine baby, Shine Shine ShineYour love is like a spotlight
Hoo, keep shining down on me
You keep me steady when I move too much
Get me ready for what's coming up
Your love is like a spotlight
