

# I've Gotta Find You

[Lonestar](#)

I've got this dream that won't go away  
When I close my eyes you're there, night or day  
Baby, whatever it takes, I've gotta find you Are you someone I know or that I'll meet by chance?  
Are you somewhere close or in a far away land?  
Across the ocean or burnin' sand, I've gotta find you I've gotta find you, don't care how long it takes  
I know when I do it'll be worth the wait  
With God as my witness and love as my guiding star Maybe Miami on some sandy beach  
New York City making waves on Wall Street  
No matter where you are, I've gotta find you, I've gotta find you You could be a checker at the grocery store  
For all I know you're the girl next door  
One thing I know for sure, I've gotta find you You might be a waitress workin' your way through school  
Or the anchor person on the 6 o'clock news  
Only my heart knows who, I've gotta find you I've gotta find you, don't care how long it takes  
I know when I do it'll be worth the wait  
With God as my witness and love as my guiding star Maybe Miami on some sandy beach  
New York City making waves on Wall Street  
No matter where you are, I've gotta find you  
No matter where you are, I've gotta find you, I've gotta find you
