Secret Society

Utopia

When we were young they would break our hearts
You and I had to go undercover
We knew in time we would be pulled apart
We found a way we could hold on to each other
Gave our souls to another world
Sealed in blood with a sacred vow
Now we've forgotten but beneath all this
A part of you and me is still there nowGo on and sing
Go on and dance
It'll all come back if you just give it a chanceDon't you remember me?
We had a secret society
Refresh your memory
We were the secret societyI never see you in the waking world
We make an effort to avoid each other
But every night we penetrate the veil
Where everybody acts like sister and brother
You never speak the words in broad daylight
They're much too delicate and too naive
But everybody's been a witness sometime
It doesn't change it if you don't believeSo go on and sing
Go on and dance
Someday soon you'll hear that little bell ringAnd you'll remember me
We have a secret society
Not just a memory
We are the secret society
You've got to come with me
You're in the secret society
Until eternity
We are the secret society (it's no secret)
