

Our Time Down Here

Alive Like Me

You're growing up so fast they say
I don't want to live a life like them
Never start think of it tonight
Because past this life knows
Getting to the shitty part too

No I don't think we're gets anything

Seek out to the words I sing
Surrounded by such evil things
I won't admit this but I hate it here

And what they don't know
Is that the voices told me I should never grow old
Was the place I learned to live alone
What they don't know
Is that I separate from God when they grew old
(You have to fall) you have to fall before you grow

So I'll say thanks for the advice
The choice is mine to make tonight
I'd rather do this on my own
Than follow, next to place
And we will never be alive
If we don't learn to live our lives
I'm running sickless till I'm done
There's nothing left to the touch
..if it's not if you think you'll take
... my heart is never alone, it's a place for you
I'm tired of the way you stepped on me
All I ever truly wanted was to love

And what they don't know
Is that the voices told me I should never grow old
Was the place I learned to live alone
What they don't know
Is that I separate from God when they grew old
(You have to fall) you have to fall before you grow

And after all you have to fall before you grow
