Sparks

James Bay

If I told you about my favourite dream
The one without you
Would you spit fire at me?
Or would you burn to know
Every single by blow
I don't know her
Maybe she isn't real
She didn't hold back
When you were lying next to meThis can't be all we are
Silent and in the darkWe could be making sparks
But we don't ignite, don't ignite
We could be making sparks
But we need to fight, need to fightCome a little closer
Remember when we used to sway
Trembling in the covers
Taking it with an only greyThis can't be all we are
Silent and in the darkWe could be making sparks
But we don't ignite, don't ignite
We could be making sparks
But we need to fight, need to fightNo I never saw the walls
Falling on us like this
Now I'm hanging from a rope
Holding my hope, my hope
I don't need it, I just want it more than anything else
I can do this aloneNo, no
We could be making sparks
But we don't ignite, don't igniteWe could be making sparks
But we don't ignite, don't ignite
We could be making sparks
But we need to fight, need to fight
