There Is a Voice

Squeeze

There is a voice within us all
That says destruct, go to the wall
And you can't choose when this voice speaks
Deep in our souls this voice will sleepThere is a voice within us all
That says destruct and you will crawl
From your own pit into the deep
Where you will sink until it speaksEach day is a night
Then your lifetime is goneThere is a voice inside us all
That says rebuild and when it's called
All that is wrong can be put right
There in your soul to change your lifeEach day's a hope, each day's a prayer
That I might build and I'll repair
The parts in me that may have slipped
Deep in my soul when I lose my gripAnd there's ropes and chains
Slowing me as I walk I feel hope through pain
As the road ahead forks
To the left and the right to the right and the wrong
