

Speak Without Faith

A Perfect Murder

We built this scene with nothing but heart
Real kids making it better than it was at the start
Those who don't feel the efforts put in those before
Will be the first to be led out of the door
Act without heart, speak without faith
You should stay away from me
Act without heart, speak without faith
You should stay away from me
Some people just get into it the wrong way
It's time to put these people back in their place
We should fight together for the right things
Fight to keep what we built
Act without heart, speak without faith
You should stay away from me
Act without heart, speak without faith
You should stay away from me
