

Baby Blue

The Early November

It's a faster growing green
That flows through these leaves
I have, I try
I guess we'll be alright
Way to try
I got a line for you from me, better nice
A beautiful baby blue sky that's looking up at you
Now watch it fade away
But it's okay to come around
With nights like this are never ending
I tried so hard to make this perfect
You and I somehow
We can't see eye to eye together
We always knew that you were better
I know you want it all and you got me
Sorry I never was everything you ever dreamed
But kept at bay for just in case that day
But it's okay to come around
With nights like this are never ending
I tried so hard to make this perfect
You and I somehow
We can't see eye to eye together
We always knew that you were better
I don't want you to love me anymore
With my bags packed and ready to go
Nothing's ever hurt so much for me than to let you go
With my bags packed and ready to go
Nothing's ever hurt so much for me than to let you go
