Ten Thousand Thrones

Testament

Cast away by darkness
It's time to let you know
Voices of many soldiers
Arise ten thousand thronesThey're just turned away, they're told that they're OK
The spread of chemical warfare
Destroyed the human race
Life is darkening, sickening
Endless conscious slumber ten thousand thronesParalyzed, depression
Schizophrenic minds
New born retardation
A war they're born to fight
Life is darkening, sickening
Endless conscious slumber ten thousand thronesCancerous tumor invading the mind
Leaving behind
Ashes are burning that fall from the sky
Politically devine
Honor the code and defending the line
Pretentious lies
The fighting of war is shattering lives
The death of mankind
