Social Disgrace

Rock Star Supernova

Every day is another excuse for me
To figure it out, I'm a social disgrace
Not in this town can I just be [Incomprehensible]
Gotta go down like I just won the race
All this will hurt when you see the dark inside
We disconnect with no regrets just living lies
This city will burn, I want her back this time
I want her back, I want her back, all it still hurts
Follow my head through a chain of events
Where I'm a fly on the wall in a circus of freaks
This place is so devil being lit up like matches
And I can't blow it out and it's torturing me
All this will hurt when you see the dark inside
We disconnect with no regrets just living lies
This city will burn, I want her back this time
I want her back, I want her back, all it still hurts
All this will hurt when you see the dark inside
We disconnect with no regrets just living lies
This city will burn, I want her back this time
I want her back, I want her back
All this will hurt when you see the dark inside
We disconnect with no regrets just living lies
This city will burn, I want her back this time
I want her back, I want her back, all it still hurts
