

# The Heart of Darkness

## Catamenia

Frost came and took your heart of darkness  
You're lost, fear creeps in and let it start  
    Night cracks the spine of dying day  
Fight but you can't make it go awayFill your soul with ravenous fire  
    Kill the light and reborn for the light  
    End up times among the pathetic lies  
Rise above the majestic lifeOpen mind for a newfound world  
    to be the part of our herdFollow us, the heart of darkness  
    Follow us, no more mortal  
    Come with us, the heart of darkness  
Follow us and you're freeBlind was the son who promised us the new kingdom  
    Died by our sins, but took away your freedom  
    The word was spread with inquisitions blades  
    Life for sale, they decided dying days
