

My Mamma Said

St Germain

We dreamed a dream - woke up and lived it

 We had the music in our hands

 The drops of rain - became a river

 And now it's time to end this dance

 - So thank you

My mamma said that the best thing in life

 Was getting me

 And loving somebody higher than anything

 else in this world baby

My mamma said that she would give her

 life up for me

My mamma said that the worst thing in life

 Is getting used

 to loving somebody higher than anything

 else in this world baby

 Knowing you're going to

 Knowing you're going to - lose it all

 Mamma don't leave - don't go

 Don't run - don't hide - don't cry

 Don't ever feel scared now

 Mamma just crossed just crossed

 To the parallel world

 She crossed she crossed to the multiverse

 Circling protons - all vibrations

 Circling neutrons - all vibrations

 Mamma just crossed just crossed to the parallel world

 She crossed she crossed to the multiverse

 And now you're lying there - taking your last breath

 I'm holding back the tears - Oh mamma don't die

 My mamma said...

 Mamma hold on - give in - let go

 Release yourself from everything out there

 Mamma just crossed just crossed

 To the parallel world

 She crossed she crossed to the multiverse

 Circling electrons - all vibrations

 Circling electrons - all vibrations

 Mamma just crossed just crossed to the parallel world

She crossed she crossed to the multiverse
And now you're lying there - taking your last breath
I'm holding back the tears - Oh mamma don't die
My mamma said...
