

Everybody's On the Move

Basia

By boat, by car, by train, by plane
By boat, by car, by train
By boat, by car, by train, by plane Tell me where you're going
'Cause here you never felt at home?
Is it thirst that drives you?
Is it love you're looking for? Is it desperation?
There must be more to life than this
Not now but one day you'll discover
One special place that you came from It's not good enough
The grass is greener over there
Go after your wandering star Everybody's on the move
Everybody's on the move
Everybody's on the move
Everybody's on the move, move, move Many different reasons
Make people leave it all behind
Some look for excitement
Others take risks to survive Let's forget the cynics
Doubting the motives of us all
Nobody knows what you desire
No one but you knows what feels right If they send us back
We will get there anyway
To try for a better life Everybody's on the move
Everybody's on the move
Everybody's on the move
Everybody's on the move Everybody's on the move
Everybody's on the move
Everybody's on the move
Everybody's on the move, move, move Is it desperation?
There must be more to life than this
Not now but one day you'll discover
One special place that you came from Because it's not good enough
The grass is greener over there
Go after your wandering star Everybody, everybody, everybody is on the move
Everybody's on the move
Everybody's on the move
Everybody's on the move, move, move Everybody's on the move
Everybody's on the move
Everybody's on the move
Everybody's on the move, move, move
