Over to You

The Superjesus

I have to tell you again but nothing seems to change the way you feel
And now I have to make a connection every day, a door to door appealCause all your friends will tell you what they want you to hear
And they're so afraid, so afraid to interfere
But I know the end is always right
No matter how I try tonight
It's over, now it's over
Over to youWhen there's a day that I needed around it's just the most that I could do right now
And would I say if you needed to hear it dont you try to throw the game somehowCause all your friends will tell you what they want you to hear
And they're so afraid, so afraid to let a fear
But I know the end is always right
No matter how I try tonight
It's over, now it's over
Over to you
Over to youI just wanted you to know before you goAnd I know the end is always right
No matter how I try tonight
It's over, now it's over
Over to you
Over to you
