

# How Does It Feel

Stanfour

Every word that you've spoken  
Was building me up just to tear me down  
And all of the promises broken  
Are scattered like leafs falling on the ground  
I gave you the best that you've ever had  
You threw it away like it just didn't matter  
Now you want it back, you say you want it back  
Well, how does it feel? How does it taste?  
Swallow your own medicine  
It's time you'll begin to feel pain  
Fate has you know can't run away  
Tables are turned, now you're left with a burn  
How does it feel? Don't try to tell me you need me  
Whenever's convenient for you to say  
Don't give a damn if you hurt me  
If it's alright then I'll treat you the same  
Every cause has reaction  
But life is too short to react to  
All the hell you've put me through  
Time will take care of you  
How does it feel? How does it taste?  
Swallow your own medicine  
It's time you'll begin to feel pain  
Fate has you know can't run away  
Tables are turned, now you're left with a burn  
How does it feel? I don't want you by my side  
Time to choke on all your pride  
Only one thing left to say  
How does it feel? How does it taste?  
Swallow your own medicine  
It's time you'll begin to feel pain  
So how does it feel? How does it taste?  
Swallow your own medicine  
It's time you'll begin to feel pain  
Fate has you know can't run away  
Tables are turned, now you're left with a burn  
How does it feel?
