

# For You

## Save Ferris

I never told you how to live your life  
I never said you had to be something you don't want to be  
I never said you had to stick around forever  
Never said you had to stick around to be with me[chorus]:

I ain't going to be responsible  
When your life don't end up full  
All your talk has become bull  
Just what do you see

Don't place the blame on meA lack of vision when you made your decision  
And you wonder why your life has turned out this way

You tried to use me and succeeded to confuse me

But now you're feeling sorry 'cause you got played(repeat chorus)Life is evil when you don't get what you want  
Memories can serve as ghosts  
They'll tease and haunt you  
When you spend your nights up late  
Wondering all about your fate  
Why did life end up this way  
For you
