April Suits

Taproot

How could you abondon me I thought you'd always be
There for me standing tall one and one for all
My support modeling rolling as a team
But insted on our own enemies of oldSeason's change the fallen rain will wash the pain away
Make amends to help understand how to live todayIt's not your fault I undertand now I'm more a man
You needed space to find yourself and I'm in the same place now
Living dreams dreaming news springing forward to
Choose a life to get me by not a life that passes byOn we march our April suits On we march in our april boots
