

# Visit Me

## Changing Faces

Sittin' here lonely, wonderin' if you're home  
Thinkin' about callin' you, 'cuz, I don't wanna be alone  
The fireplace is burnin' but baby, yet, I'm still cold  
Without your body next to me, somehow I just don't feel whole, no I'll leave the door unlocked for you, just  
come right on in  
And make yourself comfortable, I'll treat you like a friend We can talk about some things and baby we can do  
some things  
The perfect night for company, I need you to visit me  
Let's disappoint some friends and let 'em know we're stayin' in  
Makin' love until no end, I need you to visit me Now you don't have to phone me first, 'cuz baby, I'll be right  
here  
Right here babe, I've got the whole night planned for us  
Now all I need is your body near, boy you know what bell to ring  
Don't you make me wait too long, now you should get over baby  
Make yourself right at home We can talk about some things and baby, we can do some things  
The perfect night for company, I need you to visit me  
Let's disappoint some friends and let 'em know we're stayin' in  
Makin' love until no end, I need you to visit me Now once you get over, once you get over here, my darling  
You will never wanna leave, no, you won't ever want to leave, my darling  
See, forever is a plan that I have for you Are you ready, are you ready, to come over, to come over  
'Cuz I'm waiting for your loving, we can talk about  
Kissing and huggin' and touchin', feelin', are you willing? Ohh, come on over to my place  
And let me love your body down, love you down  
Said, we both could use some good lovin' tonight, yeah So much to talk about  
Here I am, a lonely woman and there you are, a lonely man  
See we got so much in common that baby you should be my man See my body is calling you and your body is  
calling me  
So come on over baby and let's talk about something We can talk about some things and baby we can do some  
things  
The perfect night for company, I need you to visit me  
Let's disappoint some friends and let 'em know we're stayin' in  
Makin' love until no end, I need you to visit me
